

Features

- Commercial grade solar lighting
- Requires 10-12 hrs charge prior to use
- 10 - 12 hours light output
- Attractive modern design
- Bolt down installation
- Ideal for illuminating paths and walkways
- Auto PIR operation*
- High quality inbuilt lithium battery
- Warranty: 1 year warranty for faulty workmanship or component failure not influenced by external means

Specifications SOLB015

- | | | | | |
|----------------|--------------------------|--------------------|---------------------------|----------------------------------|
| • Finish | Powdercoat satin black | • Solar Panel | 4.8V 140mA 5.6watt | 30 high intensity LEDs |
| • Charge time | 12 hours | • Solar Panel Size | 150H x 170Wmm | 4.2V/1500mA rechargeable battery |
| • CCT | 6000K (cool white) | • Light Source | 30 high intensity LEDs | |
| • Bollard Size | 800H x 190W x 172Dmm | • Battery | LiFePO4 battery | |
| • Brightness | Approx. 320 lumen output | • Material | Aluminium, glass diffuser | |

What is a Lumen?

In simple terms, Lumens are a measure of the total amount of visible light from a lamp or light source. The higher the lumen rating, the "brighter" the lamp will appear.

How does this compare with other light sources?

Familiar examples

- A typical 4 x D cell battery maglite will emit approx. 70 lumens

* The P.I.R. (passive infrared) sensor is activated by movement and acts as a power saving feature. The light will operate at 4 LEDs output until the PIR is activated where it will operate at 100% until no movement is detected returning to 4 LEDs output.

- Solar Panel
- 12 high intensity LEDs
Reflects light back to ground
- PIR motion sensor
- Anti corrosive aluminium body

- Stem 190 x 40mm

- Bolt-down installation
